

CYBER SMART TIPS

Let's get proactive & fully informed about cyber security

Implement 2-factor authentication* for all your social media accounts & website logins (where possible)

Regularly check www.scamwatch.gov.au for types of scams, news & alerts

Check www.cyber.gov.au for helpful advice on keeping your business protected online

Check up on companies through their direct channels of communication (i.e. phone or website), if you are unsure of a link in an email

Protect your devices by having Zero Trust Security**. This will mitigate you against online threats.

Don't be afraid to ask questions. If something doesn't look right, seek help from a trusted friend.

Keep your passwords protected by using a password manager.

Always practise **STRONG** passwords that use multiple characters and numbers which make it harder to guess.

*2-factor authentication: A two-step security verification process.

**Zero trust security: A zero trust security model, requiring all users to verify every time they login.
